Yordi Castro Rojas

Turrialba, Costa Rica · portfolio · +506 8446 6964 · jordycastro1756@gmail.com

Full Stack Developer with over a year of professional experience building business systems and digital products end to end. My core stack is Astro, React, Node.js, and .NET/C#, with SQL for data modeling. I apply Clean Architecture, SOLID, and microservices across transactional domains — finance, accounting, and logistics — as well as user-facing experiences, turning complex requirements into maintainable, measurable solutions.

PROFESSIONAL EXPERIENCE

Factor K **Remote**
Full Stack Developer for Grupo Monge *May 2026 – Present*

- Developed the commission recognition and deferral engine in .NET, with amortization schedules and configurable parameters for refinancing, early payments, portfolio sales, and bad debt.
- Implemented digital payment reconciliation in .NET, automating the matching of bank references, customer data, and accounting records across multiple currencies.
- Delivered transport guide management in Blazor and .NET 10, covering ticket validation, barcode scanning, status tracking, and exception reports.
- Designed and implemented the monthly ETL load processes for the financial Data Warehouse in SQL Server, with historical data and automated refreshes feeding margin, recovery, and placement analysis.

4Geeks **Remote**
Full Stack Developer *July 2025 – December 2025*

- Launched the company's first mobile application from scratch in Flutter, migrating existing web services into a cross-platform mobile experience.
- Redesigned MARKET-APP in Electron and React, turning an early prototype into a production-ready self-service tool with i18n support.
- Implemented real-time messaging with Angular and Firebase, adding instant notifications and chat management between candidates and recruiters.
- Refactored Python backend middlewares to integrate API Key authentication, enabling concurrent validation of OAuth and JWT tokens.

Lácteos El Torito **Remote**
Freelancer Web Developer *January 2024 – March 2024*

- Created the company's first website with Astro, Tailwind CSS, and Figma, scoring 95+ on Google Lighthouse for performance, SEO, and accessibility.

INTA Costa Rica **Remote**
Full Stack Developer *August 2023 – December 2023*

- Designed the architecture and deployment of an ERP in Blazor and .NET to centralize inventory management across multiple warehouses nationwide.
- Digitized and automated stock management, replacing physical forms and Excel sheets with a real-time SQL Server system that cut request processing time by 80%.
- Automated quarterly audit reporting in Blazor, generating PDF and Excel files in one click.

EDUCATION

Universidad de Costa Rica **Turrialba, CR**
Bachelor's Degree in Business Computing *March 2020 – February 2026*

Alura Latam + Oracle **Online**
Oracle Next Education *April 2023 – February 2024*
