Education

Universidad de Costa Rica — Turrialba, CR
Bachelor's Degree in Business Computing — March 2020 – February 2026

Experience

Factor K — Remote
Full Stack Developer for Grupo Monge — May 2026 – Present

- Implement digital payment reconciliation in .NET, using SQL Server to match bank references, customer data, and accounting records for thousands of payments across 2 currencies (CRC and USD), automating the manual compensation.
- Developed the commission recognition and deferral engine in .NET, using SQL Server for storage and amortization schedules with configurable parameters for refinancing, early payments, portfolio sales, and bad debt.
- Built the transport guide management system in Blazor and .NET 10, with ticket validation, barcode scanning, status control, and inconsistency reports, improving productivity by 20%.
- Designed and implemented the monthly ETL load processes for the Data Warehouse in SQL Server, loading millions of records, centralizing the data in one table per process and indexing the queries to eliminate wait times.

4Geeks — Remote
Full Stack Developer — July 2025 – December 2025

- Built the company's first mobile application from scratch in Flutter, migrating existing web services to a cross-platform mobile experience and keeping those services reachable from mobile.
- Redesigned MARKET-APP in Electron and React, turning an early prototype into a production-ready self-service tool with i18n support.
- Implemented a real-time messaging system with Angular and Firebase, with instant notifications and chat management between candidates and recruiters, removing email-based coordination.
- Refactored Python backend middlewares to integrate API Key authentication, enabling concurrent validation of OAuth and JWT tokens across roughly 25 endpoints.

Lácteos El Torito — Remote
Freelancer Web Developer — January 2024 – March 2024

- Created the company's first website with Astro, Tailwind CSS, and Figma, achieving 95+ on all three Google Lighthouse scores: performance, SEO, and accessibility.

INTA Costa Rica — Remote
Full Stack Developer — August 2023 – December 2023

- Designed and implemented an ERP in Blazor and .NET to centralize inventory management across multiple warehouses nationwide, also executing its deployment.
- Digitized and automated stock management, replacing physical forms and Excel sheets with a real-time SQL Server system that cut request processing time by 80%.
- Built an automated reporting module in Blazor for quarterly audits, eliminating manual consolidation and enabling PDF and Excel export in one click.

Certifications

Claude Code in Action — Anthropic Education — June 2026
Building with the Claude API — Anthropic Education — June 2026
Introduction to Model Context Protocol — Anthropic Education — June 2026
Introduction to agent skills — Anthropic Education — May 2026
Building AI Agents with n8n — LinkedIn Learning — March 2026
Scrum Fundamentals Certified (SFC) — SCRUMstudy — October 2023
Oracle Next Education — Oracle + Alura Latam — February 2024

Technical skills

Frontend & Mobile: React, Angular, Astro, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Design Systems, Figma, Flutter, React Native.
Backend: .NET, Node.js, Express, Entity Framework, Python, Java, RESTful APIs, OAuth, JWT.
Databases: SQL Server, MySQL, MongoDB.
Architecture & Patterns: Clean Architecture, Screaming Architecture, Hexagonal Architecture, SOLID Principles, Microservices.
Tools & Methodologies: Git, GitHub, Scrum, Generative AI, AI Agents, OpenCode, Claude Code.
Languages: Spanish (Native), English (B1).
